

# Litepanels MiniPlus™

Models: 5600°K Flood • 5600°K Spot • 3200°K Flood • IR

MiniPlus™ is the original heavy-duty, compact, portable, dimmable LED soft light. Available in daylight (flood and spot) and tungsten (flood) models, this powerful system provides soft, directional output. This broad lighting source is ideal to mount on a camera, wall, or any place that calls for a highly portable softlight.

## Not Power Hungry

2+ hour Snap-on Battery

Litepanels MiniPlus is three times more efficient than a conventional tungsten camera light. And, it's easy to handle because it's virtually heat free. The system offers an efficient snap-on NiMH 2+ hour battery pack. A convenient 5-step bar graph fuel gauge and improved

charge indicator displays charging status and remaining battery power when the light is in use.

The 100-240VAC international adapter/charger can either run the MiniPlus or charge the battery pack.

The optional DV Battery Adapter Plate simply snaps onto the back of the MiniPlus head, for up to 8 hours of power using 2 standard Panasonic, Canon, or Sony DV camera batteries.

DV Battery Adapter Plate accepts 2 camcorder batteries

Dims from 100% to 0 (with virtually no color shift)

## Highly Controllable

Litepanels MiniPlus heads feature an output control knob for instant dimming from 100% to 0 with minimal color shift. Output is fully flicker free and heat free, and remains consistent even as the battery voltage goes down. For additional control, units are available with precut interchangeable conversion and diffusion gels that handily slip into an integral frame. Gels are supplied in 8 or 16-piece sets customized for every MiniPlus Camera Lite Kit, One-Lite, or Dual-Lite package. These long-life filters can also be purchased either in sets or individually.

Deluxe Detachable Ball Mount and base plate

## Elegant Design

The Litepanels MiniPlus head features a smart rectangular silhouette, conveniently suited to widescreen format. Measuring just 6.83" W x 2.30" H x 1.18" D (173 mm x 60 mm x 30 mm), the head weighs only 9.6 ounces (.27 kg). With its black anodized finish and sleek design, the housing blends in with modern desktops. In fact, it is so unobtrusive that it is often used in-frame. But looks aren't everything. Built for long life, the system is protected by a tough cast aluminum housing.

### MINIPLUS PHOTOMETRICS 5600° K FLOOD

Distance	Footcandles	LUX
2 ft. / 0.6m	100	1100
4 ft. / 1.2m	26	280
6 ft. / 1.8m	13	140

### Mounting Options

The base plate allows the MiniPlus to be fully freestanding, with easy pan and tilt adjustment. The Deluxe Detachable Ball Mount with integrated camera shoe allows for multiple configurations—on the base plate, camera shoe, or with other types of mounting hardware. An optional articulating extension arm offers ultimate positioning control.

### New Remote Dimming Module

By using Litepanels' new optional wired Remote Dimming Module, operators can override the MiniPlus on-board dimmer at distances up to 25 feet, an invaluable capability when the situation calls for adjustments in intensity made away from the light fixture itself.

### Ready to Go

Litepanels MiniPlus is available in several configurations to suit individual requirements. Options range from the Camera Lite Kit, to single or dual-lite packages that feature virtually everything you'll need in a handy case: fixtures, batteries, power adapters, cables, gel kits, and power adapter plugs for worldwide compatibility. The MiniPlus DV Lite Kit comes with your choice of a Sony, Panasonic or Canon DV battery adapter plate.

### Specifications

Size: 6.83" W x 2.30" H x 1.18" D (173 mm x 60 mm x 30 mm)  
 Weight: 9.6oz (.27 kg)  
 Power Draw: 0.7 amps at 12VDC (8.4 watts)  
 Power Supply: DC: 10-30V, AC Adapter 100-240V

### Advantages:

- Heat free LED technology
- Produces bright, soft light
- Integrated dimmer 100% to 0
- 50,000+ hours of LED life
- Highly efficient
- Minimal color shift when dimming
- Absolutely flicker free 5600°K or 3200°K
- Snap-on 2+ hour rechargeable battery pack
- Deluxe Detachable Ball Mount and base plate
- DC—Run from battery, camera or car (10-30V)
- AC—Run from adapter (100-240V)
- Lightweight
- Handsome rectangular design
- Integrated heat sink
- Integral gel frame fits neatly on face of units
- Optional DV battery adapter plate for Panasonic, Canon and Sony batteries

Litepanels offers a number of MiniPlus packages including: DV Kit, One and Two-Lite Packages, Camera Lite Kit, and more

Distance	Footcandles	LUX
2 ft. / 0.6m	160	1700
4 ft. / 1.2m	72	775
6 ft. / 1.8m	28	280

## Litepanels MiniPlus Infrared

Litepanels offers the only infrared light source on the market designed by production lighting professionals. Litepanels MiniPlus Infrared facilitates working in total darkness, making it ideal when shooting in surveillance, video night mode or with infrared film. Producing no visible light, the Litepanels IR is fast becoming an invaluable tool for cinema-verite style and reality TV projects and documentaries in which you want to keep your presence minimal or shoot unseen. A single unit bounced off the ceiling can illuminate an entire room.
